

ORDINANCE NO. 178

AN ORDINANCE REGULATING THE USE OF ELECTRONIC DELIVERY DEVICES WITHIN THE CITY OF GLYNDON, MINNESOTA

THE CITY COUNCIL OF THE CITY OF GLYNDON, MINNESOTA DOES ORDAIN:

SECTION 1. PURPOSE AND INTENT

Unregulated electronic delivery devices, commonly referred to as electronic cigarettes, or e-cigarettes, closely resemble and purposefully mimic the act of smoking by having users inhale vaporized liquid nicotine or other substances created by heat through an electronic ignition system. After testing a number of e-cigarettes from two leading manufacturers, the Food and Drug Administration (FDA) determined that various samples tested contained not only nicotine but also detectable levels of known carcinogens and toxic chemicals, including tobacco-specific nitrosamines and diethylene glycol, a toxic chemical used in antifreeze. The FDA's testing also suggested that quality control processes used to manufacture these products are inconsistent or non-existent. ("Summary of results: Laboratory analysis of electronic cigarettes conducted by FDA, "Food and Drug Administration (FDA), July 22, 2009; <http://www.fda.gov/NewsEvents/PublicHealthFocus/ucm173146.htm>)

E-cigarettes produce a vapor of undetermined and potentially harmful substances, which may appear similar to smoke emitted by traditional tobacco products. Their use in workplaces and public places where smoking of traditional tobacco products is prohibited creates concern and confusion and leads to difficulties in enforcing the smoking prohibitions.

SECTION 2. DEFINITIONS

Except as may otherwise be provided or clearly implied by context, all terms shall be given their commonly accepted definitions. For the purpose of this chapter, the following definitions shall apply:
