To Whom it May Concern:

Construction is strong in Clay County. This has led to the Clay County Landfill receiving requests to dispose of contaminated soil in excess of the site's permitted volume. Builders are now having to travel further and pay more to dispose of contaminated soil and demolition materials, increasing cost and delays.

To help prevent surprise costs and further delays, Clay County Solid Waste is now requesting all permitting entities provide the following information in their building applications:

Have you secured disposal for contaminated soil and construction materials?

YES

NO

Name and phone number of disposal facility: _____
